

LAB: CSS Text and Fonts

Lesson Time: 60 Minutes

This hands on lab will familiarize you with the CSS properties for working with text and fonts, and give you practice selecting elements and changing text/font properties.

CSS Text Properties	CSS Font Properties
Text-align vertical-align Text-decoration Text-transform Letter-spacing word-spacing Line-height text-shadow	Font-family Font-style Font-size

1. Look at the **Try it Yourself** Exercises on https://www.w3schools.com/css/css_text.asp to see examples of CSS text properties.
2. Use the TEXT-ALIGN property to set the text-align to RIGHT for the WOO CLASS
3. Use the TEXT-ALIGN property to set text-align to CENTER for the MOO CLASS.
4. Use TEXT-ALIGN property to set the text-align LEFT for ALL <p> ELEMENTS
5. USE TEXT-DECORATION to add an underline to ID FOO
6. Use TEXT-TRANSFORM to make the text UPPERCASE for ID FOO.
7. Set the LETTER-SPACING to 3px for the MOO CLASS
8. Set the WORD-SPACING to 3em for the WOO CLASS.
9. Set a TEXT-SHADOW of .3em horizontal, .3em vertical, color Red for the MOO and WOO CLASS
10. Set the FONT-FAMILY to 'Georgia' for the MOO CLASS
11. Set the FONT-SIZE to 20px for the MOO CLASS
12. Set the font-size to 1.5x times the current font for the WOO CLASS (1.5em)
