

# LAB: Research Web Development

Lesson Time: 60 Minutes

Search online for at least 2 articles and news site about web development. Try to find websites that focus on news & new technology in web development, or about becoming a new web developer. After reading the articles, reflect on what it means to start your journey as a developer.

Things you can write about include why you chose to take this course, what you hope to get out of the course. Try to imagine what you'll be doing when you become a professional developer.
