

LAB: CSS List and Tables

Lesson Time: 60 Minutes

| CSS List Properties | CSS Table Properties |
|---|---|
| List-style-type List-style-image List-style-position List-style (shortcut) | Border (shortcut) Border-collapse Width Height Vertical-align |

1. Begin by reviewing the **Try it yourself** examples on W3 schools to see how each property works.

https://www.w3schools.com/css/css_list.asp

https://www.w3schools.com/css/css_table.asp

2. Create these CSS settings for the **dwarfs** id.

1. Set the list-style-type to square
2. Set the list-style position to inside
3. Set the background color to rgb(148,189,148)
4. Set the width to 25% of the available browser window using vw units

3. Create these CSS settings for the **movies** id

1. Set the list-style-type to upper-roman
2. Set the list-style-position to outside
3. Set the background color to rgb(207,158,193)
4. Set the width to 25% of the available browser window using vw units

4. Create these CSS settings for the records class
 1. Create a border around the table, 5px solid, and lightgray
 2. Set the border to be collapsed
 3. Set the width to be 50% of the browser window
5. Use nth-child to make all even tr elements background-color lightskyblue
6. Use nth-child to make all odd tr elements background-color lightgrey
7. Set the background color for the “th” elements to white
