

Online Communities

Lesson Time: 1 Hours

There is a wealth of online communities that are excellent places to continue learning. We'll list out just a few of our favorites.

YouTube:

YouTube is not the best place to learn new material, but we find it's a great way to keep up with news and new developments in the industry. Be careful with YouTube. When using Youtube, you'll find out-of-date information, wrong information, and youTubers who will ask you to purchase products, advertise, or make a donation. Also keep in mind, YouTubers make their income by creating videos and getting views, so there are a lot of "worthless" videos out there designed to get you to watch them without any real information.

However, we do think there are some good YouTube channels out there worth following. Below are a few we recommend.

Stefan Mischook

Derek Banas

Programming With Mosh

The New Boston

Brian Will

Life of Luba

Just don't spend too much time watching YouTube when you should be studying for your certification exam or working on your course work!!

Websites:

Stack Overflow - Prepares the largest and best web programming resource around. If you have questions, there is a strong chance it's already been answered on Stack Overflow.

<https://stackoverflow.com/>

Reddit Web Dev - This is a great place to ask questions and get helpful answers from the Reditt developer community.

<https://www.reddit.com/r/webdev/>

Discord

Discord is a free chat service, originally built for gaming, but has expanded to hold other communities. You can find discord programming channels using by searching on
