

On Your Own

Lesson Time: 60 Minutes

Take this time to explore and learn more on your own. You have several options to complete this lesson.

Choose One:

1. Learn more about CSS Layouts. Search the internet for articles about the different kinds of common CSS layouts used in sites. After reading the articles, write a few short paragraphs summarizing what you learned. Turn in your paper to your instructor.
2. Practice your Skills. Create a new HTML and explore adding elements freely to the page. Go crazy, try new things! Turn in your practice HTML to your instructor.
3. Catch up. If you didn't complete an assignment from earlier, take this time to work on it and get caught up.
